**Digital Transformation**

**Security Engineering**

# CLOUD ENGINEERING

Our cloud engineering services empower you to attain flexibility, control infrastructure expenses, and foster growth without becoming tied to any specific vendor.

With our extensive experience in cloud engineering, We can help you with design, develop, and deploy cloud applications with a wide range of cloud platforms and technologies. We can help you build applications that are scalable, reliable, and secure.

**Cloud Migration**

**Cloud Application Development**

**Cloud Infrastructure Management**

**Cloud Security**

By 2025, 80% of all workloads will be deployed in the cloud and Hybrid cloud will become the dominant deployment model for cloud computing - Gartner 2023

# DEVOPS & PLATFORM ENGINEERING

DevOps and platform engineering are becoming increasingly important as businesses look to accelerate their digital transformation - Gartner 2023

**Devops-as-a-Service**

**DevSecOps**

**Devops Implementation**

**Devops Training and Coaching**

Our expertise in handling large-scale production workloads ensures a resilient and secure solution that adds significant value to your business. From initial stages to optimized automations and dynamic infrastructure development, we guide you through the entire life-cycle using DevOps agile, lean, and service-oriented approaches.

## Containerization and Kubernetes

Drawing upon our expertise in diverse containerization solutions, you can effortlessly and reliably deploy applications across a wide range of platforms and computer architectures

# AI/ML & Data Analytics

## HYPERSONIC AI

HyperSonic AI platform consists of Engineered GPU systems ranging from Multi-node GPU clusters to Server farms and Workstations.

- Provides an efficient and manageable platform for AI development
- Customers can focus on code and leave the rest to SynergyWave. If something goes wrong with Infrastructure, whether it be a driver issue, kernel panic, or hardware failure our Synergy expert will take care of it.

### Data Engineering

- Build and maintain modern data architecture
- Designing and Implementing data warehouses, data lakes, and data pipelines
- Data Visualisation

### Data Science

- Use AI/ML to uncover hidden insights in data
- Identify new opportunities, improve customer service, and reduce costs.
- Develop and deploy ML models that can be used to automate tasks and make predictions.

### Intelligence Strategy

- Develop a data-driven strategy that aligns with business goals.
- Define data needs, identify the right data sources, and select the right analytics tools.
- Measure the success of your data initiatives and make adjustments as needed.

**Synergywave Solutions offers a comprehensive suite of data & analytics solutions that help technology companies make better decisions, improve customer experiences, and drive business growth.**

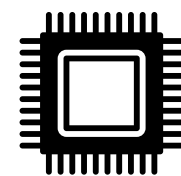

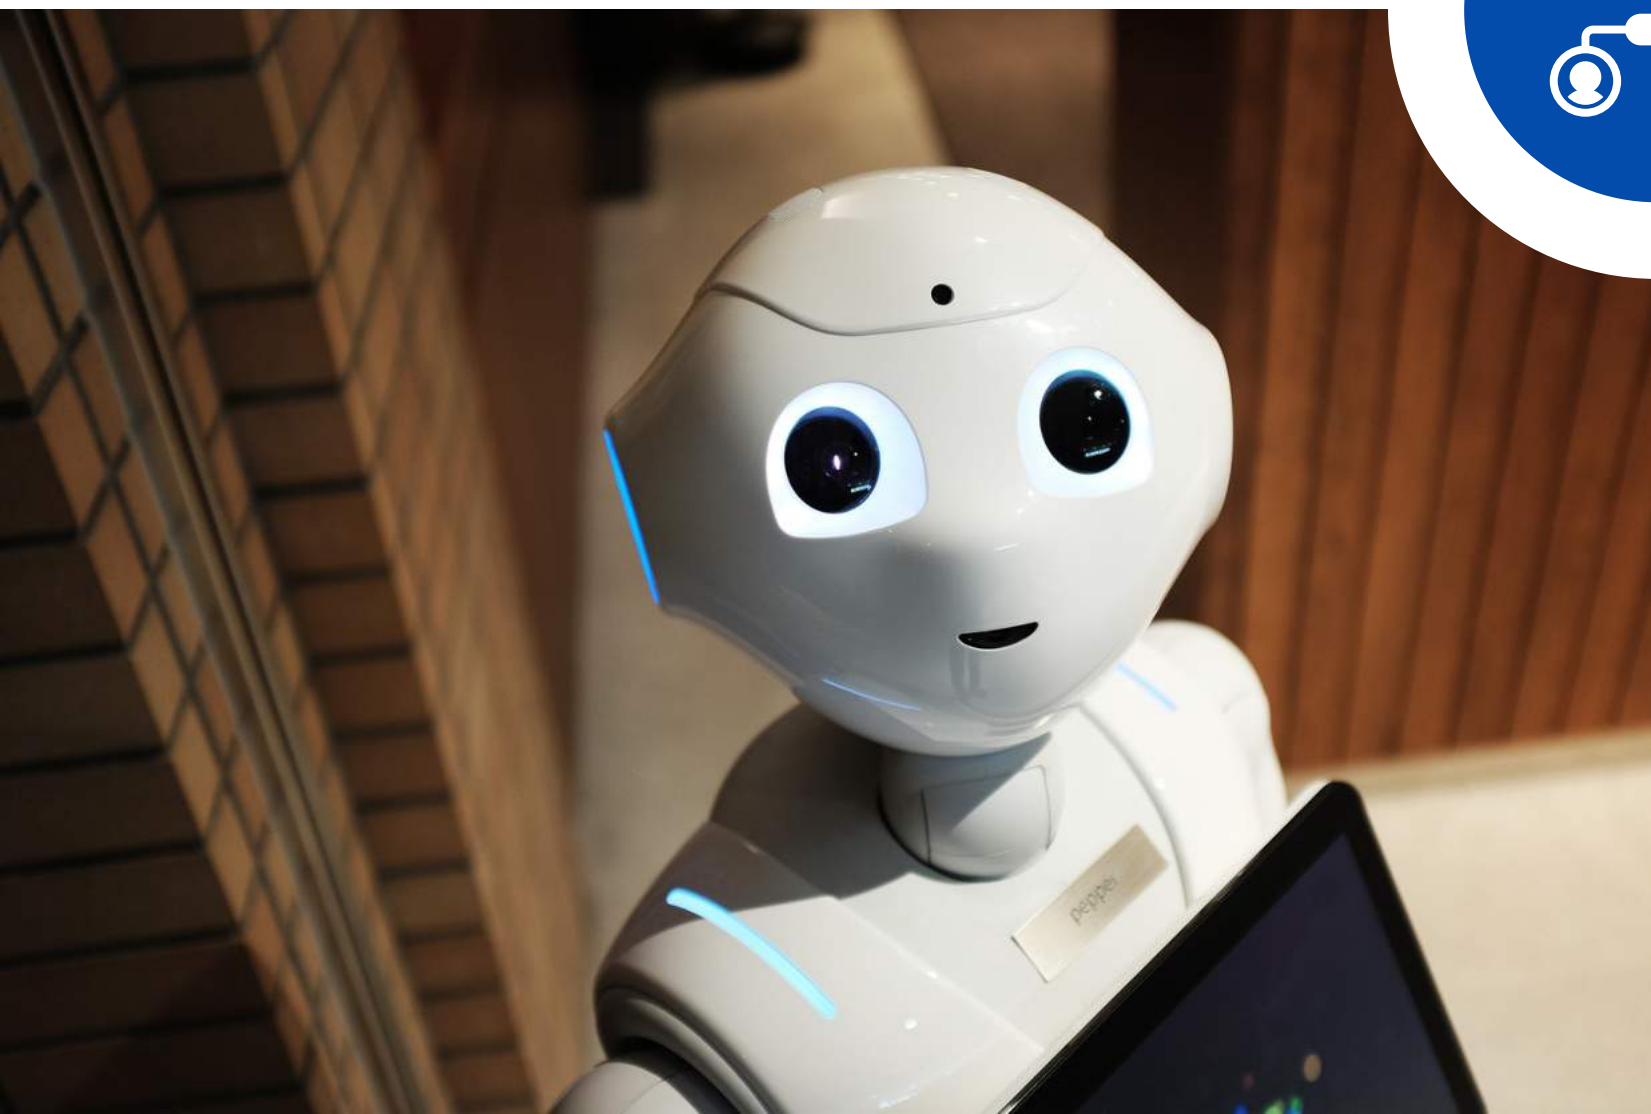

Let's grow with us

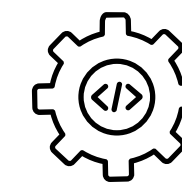

# QUALITY ENGINEERING

Develop cutting-edge, high-quality devices and applications while accelerating time-to-market through the utilization of platform test accelerators and advanced testing services

## Hardware Products

- Device Testing
- Mobile Testing
- IoT Testing
- Firmware Testing

## Software Products

- Functional Testing
- Performance Testing
- Mobile Applications
- Web Applications

At SynergyWave, security is our foremost concern. Our expert team effectively manages security threats and test against attacks across web, mobile, cloud, APIs, infrastructure, and connected devices

# WHY PARTNER WITH SYNERGYWAVE?

Business development is essential for growth and success in any industry. Whether you're launching a new venture or seeking to amplify an established one, a robust strategy and reliable IT partners are paramount. Here, we present Synergywave's four indispensable strengths that will propel you towards attaining your business goals.

## 1 Business Focused

Synergywave empowers customers with tailored solutions that align technology seamlessly with their strategic objectives.

## 2 Invest in Technology & people

SynergyWave harness the latest innovations but also nurture the skills and expertise of individuals, creating a harmonious synergy that drives sustainable growth for our customers.

## 3 Partnerships

SynergyWave has a network of partners that can provide customers with the products and services they need to succeed. These partners include leading technology vendors, system integrators, and cloud providers.

## 4 Result oriented

SynergyWave ensures that our solutions are meticulously designed to deliver tangible outcomes, enabling our customers to achieve their objectives efficiently and with unwavering precision.
